

The United States of America is a free country and XM and anybody else should be free to broadcast anything they want, anywhere they want. I want XM and I want traffic. To quell one voice and stifle competition is as unAmerican as you can get. Open competition gets the best result for the people. Let us decide what we want to hear and how and where we want to hear it. Let XM keep traffic! One group should not be allowed to dictate what the people hear. Let freedom ring!
